

## Mission Statement

“Our mission is to provide a high quality of training and assessment to learners working within the Health Care and Early Years occupational sectors. This commitment is underpinned by our belief that equality of opportunity widens participation and is essential to assisting learners to achieve their full potential. We strive to promote the benefits of training to employers and potential learners and recognise that the quality and value of our training delivery is dependent on the qualifications, experience and on-going professional development of our staff”.
